Mr. David Whiting, Environmental Engineer
Iowa Department of Water, Air and Waste Management
Regional Office #6
117 North 2nd Avenue, P.O. Box 27
Washington, IA 52353

Dear Mr. Whiting:

Per your letter of January 3, 1985, we have reviewed the options and decided to select #3.

We are documenting production and test samples from wheels coated with lead and lead free paint. This will allow us to determine how much sludge may accumulate before the lead is above the accepted level. The booths are currently being cleaned daily to be sure the sludge does not reach that level.

We feel our tests will be conclusive by March 29, 1985.

Sincerely,

SHARON CHAFIN
CHEMICAL SUPERVISOR
